# solarpermit.ORG
The National Solar Permitting Database

THE PROBLEM

More than 1 in 3 installers avoid selling solar in an average of 3.5 jurisdictions because of associated permitting difficulties.

13%

13% of all installations see requirements change during the installation process.

24% RESUBMISSIONS
16% REWORK

Resubmissions of plans occur in 24% of all installations and rework in 16% of all installations, respectively.

AVERAGE 8 WEEKS INSTALLATION

AVERAGE 14.25 STAFF HOURS

An average installation requires nearly 8 weeks to be processed by all relevant jurisdictions; staff times for installers, however, average just 14.25 hours.

THE SOLUTION

800+

Comprehensive data for 800+ local jurisdictions representing the top residential solar markets

100+

Building Code Version
